TTS Engine:

edge

Online - Microsoft Edge Neural Voice

Input Text:

Observe le "fromage" tous les jours.
Surveille régulièrement ce qui compte pour toi : ton travail, ta santé, tes relations.

Imagine-toi déjà en train de réussir.
Te visualiser heureux et adapté au changement te donne l'énergie et le courage pour faire le premier pas.

A screenshot of the Multi-Engine TTS - Free Text-to-Speech application window. The main title bar says "Multi-Engine TTS - Free". Below it, a sub-header says "Edge TTS (Online) + Piper TTS (Offline) - 100%". There are two buttons: "Subscribe on YouTube" and "Star on GitHub". A dropdown menu labeled "TTS Engine" is set to "piper". To its right is a link "Offline - Piper Local Neural Voices". On the left, there's a section for "Input Text" which is currently empty. On the right, there's a "Voice Settings" section with sliders for "Speed", "Pitch", and "Volume" (set to +0%). At the bottom, it shows "Characters: 0" and "Words: 0" on the left, and "Cost: \$0.00 (FREE!)". A large yellow speech bubble on the right contains the text: "Piper TTS - Step 2 When you click Download voices on the previous screen, you will land here, click one by one or Download All to download voices".
A modal dialog box titled "Download French Voices". It says "Found 2 French voice(s) available for download:". It lists two voices: "Siwis - Female, French" and "UPMC - Male, French", each with a "Download" button. At the bottom are "Download All (2)" and "Close" buttons, and a large blue "Generate MP3" button on the right.
